Description

The FSUK broaching nuts are designed to be installed into resin-based PCB Boards, they are installed using a flat punch with a squeeze action allowing the spigot to broach its way into the board. A stand-off version is also available. These nuts ensure a deep metal thread in the boards without the risk of cracking. They are designed to be installed into drilled or punched holes and must always be installed using a squeeze action. The tolerance on the hole must be -0.00 + 0.08mm
